Stax Milestone #7

Title: Stax

Team:
- Jason Cummings
- Alex Burnley
- Chad Lewis
- Hector Sanchez
- Yousif Barnawi
- Austin Metzner

Project Tracker: Trello

VCS: GitHub
- https://github.com/HenrysElephant1/Stax
- Note that Chad and Yousif mainly worked on backend database and deployment and in a lot of cases, we either worked on code together or sent it to each other via Airdrop or email to edit or finish before committing to GitHub, so the commits shown don't entirely reflect each person's contributions.

Deployment:

- We deployed our app on Heroku, using other Azure to remotely host our database and Filestack to serve as our image uploading service.
- https://stax-sof-dev-2017.herokuapp.com/STAX/
  - Note: make sure that the connection is secure for Google login and geolocation to work properly
