# Stax Milestone #2

Project Management Tool

We are using Trello to keep track of our project. The requirements that we have come up with are documented below on our primary Trello board.

Project Plan

We are going to use three 3-week sprints to develop our app. A rough outline for these sprints is detailed below:

Sprint 1: Setting Up the Basic App
  a) Design and develop the basic UI
  b) Access Google API to track user location
  c) Set up MySQL database on a server
Sprint 2: Implementing Primary Features
  a) Set up basic web scraping
  b) Implement in-app feed to display deals
  c) Setup MySQL for logins and basic information
  d) Improve UI design
Sprint 3: Implementing Luxury Features
  a) Setup user favorites
  b) Implement push notifications
  c) Customization/more detailed settings for a level of personalization
  d) Improve web scraping algorithm

Our plan for the first of these three sprints is documented on Trello as shown below.

3 Week Sprint Stax ☆ 👥 Team Visible
